### How to File the FBAR Electronically

The following steps describe the process of filing an FBAR electronically with our system.

#### Prerequisite

Our site requires use of the free Adobe Reader product to properly display our interactive FBAR. Please ensure you have the Adobe Reader installed on your system and you have opened the Adobe Reader application and accepted the License Agreement and made the Adobe Reader the default application for opening PDFs.

- ✓ The latest version of Adobe Reader, available for install at:
  - http://get.adobe.com/reader/

#### **Browser Configuration**

Your browser settings must be updated to open the FBAR PDF directly in the Adobe Reader as the default PDF viewer to properly display our interactive FBAR PDF. If this is not completed, you may receive either a blank screen or a prompt of *"Please wait, If this message is not eventually replaced by the proper contents of the document, your PDF viewer may not be able to display this type of document."* error message within the browser.

Follow the instructions below for your browser. The type of browser you are using can be identified by clicking on the Help menu and locating the About link (About Firefox, About Internet Explorer, About Google Chrome, for example).

We have tested the following browsers with the BSA E-Filing System:

- Internet Explorer 8.0 or higher
- FireFox 19.0.2 or higher
- Chrome 25 or higher
- Safari v7.0.2 with Apple OS X Version 10.9.2

NOTE: The BSA E-Filing System currently does not support mobile devices including devices running Apples iOS.

#### **Firefox Browser**

Open Firefox. Select Tools → Options:

Click the Applications icon, scroll down to Portable Document Format, and select Use Adobe Reader (default) in the Action column, and then select OK. This is the only change that is needed.
